ZERO

"The idea of nothing being something
is already deep in Indian culture.

If you think about Nirvana,
it's the state of Nothingness –
all your worries and desires go.

So why not have a symbol for nothing?"
That symbol was called

"Shunya"

a word still used today to mean
both **Zero** *as a number,*
and **Zero** *as a concept.....*

Presenting **Zero** *Series Laminates*

NATURAL BY DESIGN

IMPERFECT

ZERO

IMPERFECT

"Nature's imperfections create its greatest beauty."

Inspired by the character of handcrafted wood veneers, Imperfect Cherry celebrates the subtle irregularities that make natural surfaces truly distinctive. Gentle grain movement, organic texture variations, and warm cherry undertones come together to create a design that feels both refined and genuine.

Rather than striving for uniformity, Imperfect Cherry embraces nature's unique expression, adding depth, warmth, and personality to interior spaces. Its understated elegance complements contemporary, hospitality, retail, and residential environments where authenticity and sophistication are equally valued.

A surface designed to bring timeless charm and natural character into modern interiors.
